

Open Data Camp 8 - Wolverhampton

Day 2 - Session 2 - Room 113

You can view details of all the sessions at http://bit.ly/ODCamp_SessionGrid

Title of session

- "Dear Park" If there was an app to engage with green spaces - what would it look like?

Leader(s)

- Name: @jargonautical

Session notes

All sessions are carried out under Chatham House Rules - please get permission before attributing someone

We're doing some work thinking about how people engage with green spaces.

We pulled together a data catalogue, etc.

We've been left with a "so what?"

Funders and partnership are happy.

What use is this to people who aren't data people.

Example of people giving trees email addresses.

What would you like if you have a day free, what sort of thing would be useful and what would you want to know about that place?

What would a scalable data model for multiple green spaces look like (it might combine different standards)

I could publish and then ask people to help with it.

Example data:

1. Is my dog allowed off-lead?
2. Is there a place to sit down, throw a blanket and spend time?
3. Is there more to do than just walk through the park
4. Is there a place to camp?
5. Are there toilets?
6. What ticks, deer, etc. are there?
7. What is the green coverage like?
8. Something about the terrains
9. Is it all a type of grass
10. Can I take a buggy or a wheelchair?
11. Local pollen forecast

12. Air quality in general
13. Size of the area
14. Entrance fees?
15. Parking fees?
16. Transport accessibility
17. Activities available
18. When this place is most busy
19. Walking routes
20. What kind of site is it (historical, religious, etc.)
21. What is the historical purpose of this space?
22. Safety (at different times of day)
23. Fly tipping
24. Locations of bins and dog bins
25. Activities for children (by age ranges)
26. The surface of the local paths
27. Who is responsible for the place?
28. Can I go there and plant food?
29. Can I go there and pick food?
30. Are there fitness activities/gym equipment
31. Can I build my route?
32. Bookings (if you want to book an activity)
33. Noise
34. Disused/brownfield spaces
35. Where is the nearest cafe/toilets if there isn't one in the park (e.g. openstreet map)
36. Hunting/shooting(inc. Military ranges) going on?

Virtual version

1. Images
2. Sounds (field recordings)
3. Topology

Could it be any type of green space?

Think about subdividing larger spaces (national park for example)

A project we're doing is about the temporality of space, what is ok in the day might feel less safe in the night.

It would be great if you could find somewhere nearby based on keywords

We looked in [Public Activities in Public spaces \(Gehl Institute\)](#)

Purposeful, planned or accidental, liminal spaces.
